AQAR-2023-24

Criterion 7 Institutional Values and Social Responsibilities

Metric No. 7.1.3. Describe the facilities in the Institute for the management of the following types of degradable and non-degradable waste.

Submitted to

THE NATIONAL ASSESSMENT AND ACCREDITATION COUNCIL

Response:

Solid Waste: Vidyodaya Law College has devised methods for efficient and safe disposal of waste. The idea behind recycling is to limit energy usage by replacing non-renewable source of energy with renewable energy sources. Measures are taken to reduce and reuse the waste generated in the campus. No hazardous or bio-medical waste is generated in the institution. The institution ensures segregated collection of bio-degradable and non-biodegradable waste. Separate bins for Wet and Dry wastes have been placed across the campus. The BBMP approved contractor collects solid waste from the pit on day-to-day basis. The same is transported to the nearest land fill and solid waste management facility for proper disposal. The foliage waste is collected and disposed in an environment friendly manner.

Separate bins are placed for disposal of sanitary napkins in the ladies' washrooms. Newspapers, magazines, shredded papers, old office records and other paper waste are disposed at regular intervals. The Vidyodaya Law College is recognised as Swachhatha Action Plan Institution by Government of India, for its progressive endeavour towards green campus and received Swatch Award. To inculcate responsibility in faculty, students and community towards environment, awareness programmes are conducted about the practices of reduction, reuse and recycling of resources.

Liquid Waste Management: The water tanks, drinking water taps, RO water filters; drainage and water pipelines are serviced and maintained regularly. There is a good network of underground sewer lines and the sewage disposal is connected to the main BWSSB manhole outside the campus. Silage from washrooms, basins and sinks are drained off. Float valves are provided to the overhead tanks to avoid overflow. Treated waste water from the plant and RO waste water would be used for gardening purpose and flushing in the toilets. The rain water are collected through the system of Rain Water Harvesting and utilized in an efficient manner. The generation of liquid waste in the law colleges is minimal.

E-Waste Management: Electronic devices are put to optimum use. Reusable electronic parts are collected and used in other systems. The defective and non-serviceable items such as monitor, printers, CPU, keyboard, Typewriter, Xerox Machine, are handed over to the management for their disposal.
